Subject: Application for this position

To the kind attention of The Recruiter in Target Company

Here you would have to write your cover letter. It's not the scope of this template to give any indication on the content nor the style.

I'm also not the right person to give such kind of hints, I believe.

You will find around plenty of guides, howtos and tutorials on what to write in a cover letter, how to write it, who to address and so on.

The content and the style are also highly dependent on the specific field.

Sincerely,

Name Surname
